## To the Chair of the Board South Australian Forestry Corporation

### Opinion

I have audited the financial report of the South Australian Forestry Corporation for the financial year ended 30 June 2023.

In my opinion, the accompanying financial report gives a true and fair view of the financial position of the South Australian Forestry Corporation as at 30 June 2023, its financial performance and its cash flows for the year then ended in accordance with relevant Treasurer's Instructions issued under the provisions of the *Public Finance and Audit Act 1987* and Australian Accounting Standards.

The financial report comprises:

- a Statement of Comprehensive Income for the year ended 30 June 2023
- a Statement of Financial Position as at 30 June 2023
- a Statement of Changes in Equity for the year ended 30 June 2023
- a Statement of Cash Flows for the year ended 30 June 2023
- notes, comprising material accounting policy information and other explanatory information
- a Certificate from the Chair, Chief Executive and the Chief Finance Officer.

### Basis for opinion

I conducted the audit in accordance with the *Public Finance and Audit Act 1987* and Australian Auditing Standards. My responsibilities under those standards are further described in the 'Auditor's responsibilities for the audit of the financial report' section of my report. I am independent of the South Australian Forestry Corporation. The *Public Finance and Audit Act 1987* establishes the independence of the Auditor-General. In conducting the audit, the relevant ethical requirements of APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* have been met.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

### **Responsibilities of the Chief Executive and members of the Board for the financial report**

The Chief Executive is responsible for the preparation of the financial report that gives a true and fair view in accordance with relevant Treasurer's Instructions issued under the provisions of the *Public Finance and Audit Act 1987* and the Australian Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Chief Executive is responsible for assessing the entity's ability to continue as a going concern. The Chief Executive is also responsible for disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the assessment indicates that it is not appropriate.

The members of the Board are responsible for overseeing the entity's financial reporting process.

### **Auditor's responsibilities for the audit of the financial report**

As required by section 31(1)(b) of the *Public Finance and Audit Act 1987* and section 32(4) of the *Public Corporations Act 1993*, I have audited the financial report of the South Australian Forestry Corporation for the financial year ended 30 June 2023.

My objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with Australian Auditing Standards, I exercise professional judgement and maintain professional scepticism throughout the audit. I also:

- identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the South Australian Forestry Corporation internal control
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Chief Executive
- conclude on the appropriateness of the Chief Executive's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify the opinion. My conclusion is based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause an entity to cease to continue as a going concern
- evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

My report refers only to the financial report described above and does not provide assurance over the integrity of electronic publication by the entity on any website nor does it provide an opinion on other information which may have been hyperlinked to/from the report.

I communicate with the Chief Executive and members of the Board about, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during the audit.

## Notes to the Financial Statements For the year ended 30 June 2023

### 1 About the South Australian Forestry Corporation

The South Australian Forestry Corporation (ForestrySA) was established under the *South Australian Forestry Corporation Act 2000* on 1 January 2001. ForestrySA is subject to the provisions of the *Public Corporations Act 1993*.

Key responsibilities of ForestrySA are to:

- Manage state-owned plantation forests for commercial production in line with best practice standards for forestry operations and environmental management;
- Maximise the value of the Corporation whilst achieving other key requirements of government;
- Encourage and facilitate regionally based economic activities based on forestry and other industries;
- Support regional resource protection initiatives and programs;
- Support the concept of environmental sustainability which assists in the protection of natural assets and market accessibility; and
- Support cooperative research activities within the forestry industry.

#### Green Triangle agency agreement

The South Australian Government retains obligations in the Green Triangle region as stipulated under the Operations Deed related to the South Australian Plantation Lease Agreement with OneFortyOne Plantations Pty Ltd (OFO). These include native forest management, community use of forests, community fire protection and forest industry support activities performed by ForestrySA on behalf of government under a Memorandum of Administrative Arrangement (MoAA) for delivery of Community Service Obligations.

#### Dividend payments

In the event ForestrySA makes a profit it is required to pay a dividend to Government.

### 1.1 Basis of preparation

The financial statements are general purpose financial statements prepared in compliance with:

- section 23 of the *Public Finance and Audit Act 1987*;
- Treasurer's Instructions and Accounting Policy Statements issued by the Treasurer under the *Public Finance and Audit Act 1987*; and
- relevant Australian Accounting Standards.

For the purposes of preparing the financial statements, Forestry SA is a for-profit entity. The financial statements are prepared based on a 12 month reporting period and presented in Australian currency. The historical cost convention is used unless a different measurement basis is specifically disclosed in the note associated with the item measured.

Income, expenses and assets are recognised net of the amount of Goods and Services Tax (GST) except:

- when the GST incurred on a purchase of goods or services is not recoverable from the Australian Taxation Office (ATO), in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item applicable; and
- receivables and payables, which are stated with the amount of GST included.

Assets and liabilities that are to be sold, consumed or realised as part of the normal operating cycle have been classified as current assets or current liabilities. All other assets and liabilities are classified as non-current.

Where asset and liability line items combine amounts expected to be realised within 12 months and more than 12 months, ForestrySA has separately disclosed the amounts expected to be recovered or settled after more than 12 months.

Tax Equivalent Payments are required to be paid by ForestrySA to the Treasurer, in accordance with Treasurer's Instruction 22, if an accounting profit is achieved. When applicable, income tax equivalent is calculated as 30% of accounting profit before tax, adjusted for forest assets revaluation gains or losses and after deducting any approved forest operating costs which have been capitalised to the forest assets. Land revaluation increments included in Comprehensive Income are also excluded from tax calculations.

**Notes to the Financial Statements**  
**For the year ended 30 June 2023**

**1.2 Changes in Accounting Policy**

Upon review of asset useful lives the span of lives detailed in note 4.2 has been expanded to account for the varying nature of assets within these classes. There has been no material affect to the financial statements as a result of this change.

Some log sales agreements contain a clause which guarantees 85% of the value of the contracted annual log supply, even if the customer does not achieve the agreed monthly purchase volumes.

The accounting policy has been changed such that these guaranteed volumes of log sales are no longer considered an unconditional right to consideration under AASB15 Revenue from Contracts with Customers. Contract receivables and contract liabilities as at 30 June 2022 have been derecognised. The resulting effect on the financial statements is detailed below

**Receivables (2021-22 note 6.2)**

**1.4 Impact of COVID-19 pandemic**

With market demand remaining positive, the COVID-19 pandemic has had little impact on the financial result of ForestrySA, however interruptions to logistics and contractor availability have delayed capital works projects related to Fire vehicle upgrades, the Fox Creek rebuild Grant and some non plantation commercial opportunities.

**1.5 Significant transactions with government related entities**

Significant transactions with the SA Government are identifiable throughout this financial report.

In addition:

- ForestrySA receives funding from the SA Government for the provision of certain non-commercial operations. These are the community service obligations (CSOs):
  1. Native forest management,
  2. Community use of forests,
  3. Community fire protection.
- Lease payments relate to vehicles supplied by Fleet SA.
- Funding for use of the Government Radio Network (GRN).
- MoAA with Department for Environment and Water (DEW) for the sub-contracting of land and fire management requirements in the Green Triangle region.
- Funding for the Green Triangle fire tower project administered by Department of Primary Industries and Regions (PIRSA).

The total remuneration received by those employees for the year was \$510,000 (2022: \$418,000).

The table includes all employees who received remuneration equal to or greater than the base executive remuneration level during the year. Remuneration of employees reflects all costs of employment including salaries and wages, payments in lieu of leave, superannuation contributions, salary sacrifice benefits and fringe benefits and any fringe benefits tax paid or payable in respect of those benefits.

**Notes to the Financial Statements**  
**For the year ended 30 June 2023**

**Targeted Voluntary Separation Packages (TVSPs) and Public Sector Rejuvenation packages**

The number of employees who received or are entitled to receive Separation Packages during the reporting period was 0 (2022: 1).

Long service leave	648	501
<b>Total non-current employee benefits</b>	<b>648</b>	<b>501</b>
<b>Total employee benefits</b>	<b>980</b>	<b>990</b>

Employee benefits accrue as a result of services provided up to the reporting date that remain unpaid. Long-term employee benefits are measured at present value and short-term employee benefits are measured at nominal amounts.

**Salaries and wages, annual leave, skills and experience retention leave (SERL) and sick leave**

The liability for salaries and wages is measured as the amount unpaid at the reporting date at remuneration rates current at the reporting date.

The annual leave liability and the SERL liability in full is expected to be payable within 12 months and is measured at the undiscounted amount expected to be paid.

No provision has been made for sick leave as all sick leave is non-vesting and the average sick leave taken in future years by employees is estimated to be less than the annual entitlement for sick leave.

**Long service leave**

The liability for long service leave is measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. Details about the measurement of long service leave liability is provided at note 10.1.

**Notes to the Financial Statements**

<b>Total contractors</b>	<b>9,835</b>	<b>11,582</b>

Inter governmental contractors relate to the MoAA with Department for Environment & Water (DEW) for the sub-contracting of land & fire management requirements in the Green Triangle region as part of the organisations community fire protection program.

The redevelopment of the Fox Creek Bike Park is funded via a grant received from the Commonwealth Government National Bushfire Recovery Fund via the Local Economic Recovery Program.

The advanced fire protection project was a Government initiative for improved fire prevention and detection in the Green Triangle region funded by ForestrySA across the 2020-21 and 2021-22 financial years.

**4.2 Depreciation and amortisation**

	2023	2022
	\$'000	\$'000
Buildings and structures	233	551
Plant and equipment	356	322

Roads and land improvements	233	185
Intangible assets	26	20
<b>Total depreciation and amortisation</b>	<b>990</b>	<b>1,192</b>

All non-current assets, with a limited useful life, are systematically depreciated/amortised over their useful lives in a manner that reflects the consumption of their service potential.

**Useful life**

Depreciation and amortisation are calculated on a straight-line basis. Property, plant and equipment and intangible assets depreciation are calculated over the estimated useful life as follows:

<b>Class of asset</b>	<b>Useful life (years)</b>
Buildings and structures	1-60
Plant and equipment	1-25
Right-of-use plant and equipment	Lease term
Road and land improvements	1-25
Intangibles	1-3

**Review of accounting estimates**

Assets' residual values, useful lives and amortisation methods are reviewed and adjusted, if appropriate, on an annual basis. Changes in the expected life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for prospectively by changing the time period or method, as appropriate. A review of depreciation was conducted during the transfer of assets to a new financial reporting system with some amendments being made to useful life.

The span of useful lives of asset classes have been expanded to allow for the varying nature of assets held by the organisation within each class of asset.

	2023 \$'000	2022 \$'000
Green Triangle community fire protection initiatives	2,346	-
<b>Total</b>	<b>2,346</b>	<b>-</b>

The State has the responsibility for maintenance of Fire Towers in the GT under its Operations Deed with One Forty One Plantations Pty Ltd (OFO). This has historically been delegated to ForestrySA. Over two years and concluding in June 2022 ForestrySA provided \$1.1m in funding for the advanced fire protection project in the GT region (refer note 4.1).

At the end of the 2023 financial year ForestrySA provided funding of \$2.346m for the upgrade of fire towers in the Green Triangle, and to transition ongoing operations and maintenance for the fire towers and fire detection program to OFO. The Project involves replacing fire towers with new technologies such as camera technology to provide a landscape level fire detection program whilst ensuring existing fire towers are serviceable during the transition period. The administration of the funds is being undertaken by the Department of Primary Industries and Regions.

**5 Non-financial assets**

**5.1 Property, plant and equipment by asset class**

Property, plant and equipment comprises owned and right-to-use (leased) tangible assets that do not meet the definition of investment property.

**5.2 Property, Plant and equipment owned by Forestry SA**

Property, plant and equipment owned by ForestrySA with a value equal to or in excess of \$10,000 is capitalised, otherwise it is expensed. Property, plant and equipment owned by ForestrySA is recorded at fair value. Detail about ForestrySA's approach to fair value is set out in note 10.2.

**Impairment**

Fire towers in the GT region have had an impairment entry to bring their value in the books of ForestrySA to Nil. The value of the adjustment was \$45,000

All other property, plant and equipment owned by ForestrySA has not been assessed for impairment as they are non-cash generating assets, that are specialised in nature and held for continual use of their service capacity.

Revaluation of property, plant and equipment is undertaken on a regular cycle as detailed in Note 10.2. If at any time management considers that the carrying amount of an asset materially differs from its fair value, then the asset will be revalued regardless of when the last valuation took place.

**5.3 Property, plant and equipment leased by ForestrySA**

Property, plant and equipment leased by ForestrySA is recorded at cost. Additions to leased property, plant and equipment during 2022-23 were \$78,000 (2021-22: \$35,000).

Short-term leases of 12 months or less and low value leases where the underlying asset value is less than \$15,000 are not recognised as right-of-use assets. The associated lease payments are recognised as an expense and are disclosed in note 4.4.

ForestrySA has a limited number of leases:

- 20 motor vehicle leases with the South Australian Government Financing Authority (SAFA). Motor vehicle leases are non-cancellable, with rental payments monthly in arrears. Motor vehicle lease terms can range from 2 years (40,000km) up to 5 years (100,000km). No contingent rental provisions exist within the lease agreements and no options exist to renew the leases at the end of their term.

The lease liabilities related to the right-of-use assets are disclosed in note 7.2. ForestrySA's maturity analysis of its lease liabilities is disclosed in note 10.3. Expenses related to leases, including depreciation and interest expenses, are disclosed in note 4. Cash outflows related to leases are disclosed in note 8.2.

**Impairment**

Property, plant and equipment leased by ForestrySA has been assessed for impairment. There was no indication of impairment. No impairment loss or reversal of impairment loss was recognised.

**5.4 Intangible assets**

Purchased computer software	2,722	2,722
Accumulated amortisation	(2,718)	(2,692)
<b>Total computer software</b>	4	30
<b>Total intangible assets</b>	4	30

Intangible assets are initially measured at cost and are tested for indications of impairment at each reporting date. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and any accumulated impairment losses.

The acquisition of or internal development of software is capitalised only when the expenditure meets the definition and recognition criteria and when the amount of expenditure is greater than or equal to \$10,000.

<b>Total non-current assets classified as held for sale</b>	<b>2,299</b>	<b>1,959</b>

Non-current assets are classified as held for sale and stated at the lower of their carrying amount or fair value less costs to sell if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset's sale is expected to be completed one year from the date of classification, except for events or circumstances beyond the entity's control where it is still committed to sell the asset.

Land held for sale relates to the divestment of forest reserve in the Mid North region in accordance with the Mid North Forests Future Strategy. It is expected this land will be divested from ForestrySA during the 2023-24 financial year.

Cash Management Fund	16,773	17,795
<b>Total cash and cash equivalents</b>	<b>19,258</b>	<b>20,834</b>

**Deposits and cash management fund**

Deposits include funds held with the Commonwealth Bank of Australia (CBA). These funds are used for operational purposes in accordance with the Treasurer's/Under Treasurer's approval. Cash Management Fund (CMF) deposits are lodged with SAFA and earn interest at the respective CMF rate.

**6.2 Receivables**

	<b>2023</b>	<b>2022</b>
	<b>\$'000</b>	<b>\$'000</b>
<b>Current</b>

Accrued revenue	57	48
Prepayments	134	235
GST receivable	97	-
<b>Total current receivables</b>	<b>2,264</b>	<b>1,714</b>

Trade receivables arise in the normal course of selling goods and services to other government agencies and to the public. Trade receivables are normally settled within 30 days after the issue of an invoice or the goods/services have been provided under a contractual arrangement.

Other than as recognised in the allowance for impairment loss on receivables, it is anticipated that counterparties will discharge their obligations. The carrying amount of receivables approximates net fair value due to being receivable on demand. There is no concentration of credit risk.

Refer to note 10.3 for further information on risk management.

Statutory receivables do not arise from contracts with customers. They are recognised and measured similarly to contractual receivables (except impairment) but are not classified as financial instruments for disclosure purposes.

Receivables, prepayments and accrued revenues are non-interest bearing. Receivables are held with the objective of collecting the contractual cash flows and they are measured at amortised cost.

<b>Allowance for impairment loss on receivables</b>	<b>2023</b>	<b>2022</b>

<b>Carrying amount at the end of the period</b>	<b>30</b>	<b>155</b>

All the above impairment losses are from receivables arising from contracts with customers and licences with licensees.

Refer to note 10.3 for details regarding credit risk and the methodology for determining impairment.

<b>Total non-current payables</b>	<b>46</b>	<b>47</b>
<b>Total payables</b>	<b>1,057</b>	<b>1,554</b>

Payables and accruals are raised for all amounts owing but unpaid. Sundry payables are normally settled within 30 days from the date the invoices is first received. All payables are non-interest bearing. The carrying amount of payables represents fair value due to their short-term nature.

Statutory payables do not arise from contracts.

The net amount of GST recoverable from the ATO is included as part of receivables. However, if a net GST payable arises then this amount would be disclosed in this Payables note.

**Employment on-costs**

Employment on-costs include payroll tax and superannuation contributions and are settled when the respective employee benefit that they relate to is discharged.

ForestrySA contributes to State Government and externally managed superannuation schemes. These contributions are treated as an expense when they occur. There are no liabilities for payments to beneficiaries as they have been assumed by the respective superannuation schemes. The only liability outstanding at reporting date relates to any contributions due but not yet paid to Superannuation funds.

As a result of an actuarial assessment performed by the Department of Treasury and Finance, the proportion of long service leave taken as leave is 43% (2022: 42%). The factor for the calculation of employer superannuation on-costs is 11.0% (2022: 10.1%). These rates are used in the employment on-cost calculation. The net financial effect of the changes in the current financial year is immaterial.

A provision has been reported to reflect unsettled workers compensation claims. The workers compensation provision is based on actuarial assessment of the outstanding liability as at 30 June 2023 provided by a consulting actuary engaged through the Office of the Commissioner for Public Sector Employment. The provision is for the estimated cost of ongoing payments to employees as required under current legislation. The movement in the provision has been recorded as an expense and is disclosed in Note 4.4.

ForestrySA is responsible for payment of workers compensation claims.

**8 Other disclosures**

**8.1 Equity**

The asset revaluation surplus is used to record increments and decrements in the fair value of property and plant and equipment to the extent that they offset one another. Relevant amounts are transferred to retained earnings when an asset is derecognised.

The forest assets reserve is used to record increments and decrements in the fair value of forest assets. A gain or loss arising on initial recognition of a biological asset at fair value less costs to sell and from a change in fair value less costs to sell of a biological asset shall be included in profit or loss for the period in which it arises.

**Notes to the Financial Statements**  
**For the year ended 30 June 2023**

**8.2 Cash flow**

Cash flows are included in the Statement of Cash Flow on a gross basis and the GST component of cash flow arising from investing and financing activities, which is recoverable from, or payable to, the ATO is classified as part of operating cash flows.

<b>Total lease receivable commitments</b>	<b>317</b>	<b>570</b>

Lease receivable commitments relate to the office building located in Mt Gambier where space is leased from ForestrySA.

**9.2 Contingent assets and liabilities**

Contingent assets and contingent liabilities are not recognised in the Statement of Financial Position, but are disclosed by way of a note and, if quantifiable, are measured at nominal value.

ForestrySA has contingent assets in the form of bank guarantees issued by various banks for ForestrySA customers.

ForestrySA and the SA Superannuation Board entered an arrangement at the time of incorporation of ForestrySA to allow officers and employees of ForestrySA who were immediately before incorporation of ForestrySA contributors to the State Superannuation Scheme, to remain contributors under the *Superannuation Act 1988*.

**9.3 Impact of standards not yet effective**

ForestrySA has assessed the impact of new and changed Australian Accounting Standards Board Standards and Interpretations not yet effective and has assessed there will be no impact on ForestrySA.

---

**9.4 COVID-19 pandemic outlook**

The COVID-19 pandemic may continue to impact the operations of ForestrySA in 2023-24. The key expected impacts are:

- The availability of contractors to perform various activities.

**9.5 Events after the reporting period**

There were no events after the reporting period that required adjustments.

**10 Measurement and risk**

**10.1 Long service leave liability - measurement**

AASB 119 *Employee Benefits* contains the calculation methodology for long service leave liability.

The actuarial assessment performed by the Department of Treasury and Finance has provided a basis for the measurement of long service leave and is based on actuarial assumptions on expected future salary and wage levels, experience of employee departures and periods of service. These assumptions are based on employee data over SA Government entities.

AASB 119 *Employee Benefits* requires the use of the yield on long-term Commonwealth Government bonds as the discount rate in the measurement of the long service leave liability. The yield on long-term Commonwealth Government bonds has increased from 2022 (3.5%) to 2023 (4.0%).

This increase in the bond yield, which is used as the rate to discount future long service leave cash flow, reduces the increase in the reported long service leave liability.

The net financial effect of the changes to actuarial assumptions in the current financial year is an increase in the long service leave liability of \$100k. The impact on future periods is impracticable to estimate as the long service leave liability is calculated using a number of demographical and financial assumptions – including the long-term discount rate.

The actuarial assessment performed by the Department of Treasury and Finance increased the salary inflation rate to 3.5% (2.5% 2022) for long service leave liability. As a result, there is no material financial effect resulting from changes in the salary inflation rate.

Current long service leave reflects the portion of leave expected to be settled within the next 12 months, based on previous experience.

### 10.2 Fair value

AASB 13 *Fair Value Measurement* defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants, in the principal or most advantageous market, at the measurement date.

#### Initial recognition

Non-current tangible assets are initially recorded at cost or at the value of any liabilities assumed, plus any incidental cost involved with the acquisition.

Where assets are acquired at no value, or minimal value, they are recorded at fair value in the Statement of Financial Position. However, if the assets are acquired at no or nominal value as part of a restructure of administrative arrangements, then the assets are recognised at book value (i.e. the amount recorded by the transferor public authority immediately prior to the restructure).

#### Revaluation

Property, plant and equipment are subsequently measured at fair value after allowing for accumulated depreciation.

The revaluation process is reviewed by the Chief Finance Officer and Audit and Risk Committee as required.

Non-current tangible assets are valued at fair value and revaluation of non-current assets or a group of assets is only performed when fair value at the time of acquisition is greater than \$1.5 million and estimated useful life is greater than three years.

Revaluation is undertaken on a regular cycle as detailed below. If at any time management considers that the carrying amount of an asset materially differs from its fair value, then the asset will be revalued regardless of when the last valuation took place.

A gain or loss arising from a change in fair value less costs to sell of a biological asset shall be included in profit or loss for the period in which it arises.

Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amounts of the assets and the net amounts are restated to the revalued amounts of the asset.

#### Fair value hierarchy

ForestrySA classifies fair value measurement using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements, based on the data and assumptions used in the most recent revaluation.

- Level 1 – traded in active markets and is based on unadjusted quoted prices in active markets for identical assets or liabilities that the entity can access at measurement date.
- Level 2 – not traded in an active market and are derived from inputs (inputs other than quoted prices included within level 1) that are observable for the asset, either directly or indirectly.
- Level 3 – not traded in an active market and are derived from unobservable inputs.

ForestrySA's policy is to recognise transfers into and out of fair value hierarchy levels as at the end of the reporting period.

During 2023 and 2022, ForestrySA had no valuations categorised into level 1; there were no transfers of assets between level 1 and 2 fair value hierarchy levels and there were no changes in valuation technique.

**Forest assets**

ForestrySA engaged Indufor to establish the valuation for its plantation estate in the Mt Lofty Ranges as at 30 June 2023.

Indufor has adopted the marked based valuation approach which involves a combination of the sales comparison method and income approach under a discounted cash flow framework. The discount rate applied by Indufor to the projected cash flows was 8.0% (2022:7.5%). The cash flows are those for multiple rotations extending across a 60-year period.

This value opinion is considered to be compliant with Australian Accounting Standards Board (AASB) 141 Agriculture and International Accounting Standards (IAS) 41 Agriculture, AASB 13 and International Financial Reporting Standards (IFRS) 13 Fair Value Measurement and Uniform Standards of Professional Appraisal Practice 2018-19 (USPAP) market value. This value assumes that the asset will have received full exposure to the market over a period of one year.

**Significant unobservable inputs**

- Growth and yield
- Forest management, production, sales, general, and administration costs
- Log and wood products markets and prices
- Discount rate calculation - evidence based and theoretical costs of capital
- Annual harvest volume (165,000 - 218,000 m3, weighted average 190,000 m3)

The valuation assumes that the commercial plantation land has no value because it is not freehold land and cannot be traded in an open and competitive market. It is reserved by the state in perpetuity for production forestry or public reserve as Crown land, thereby negating any fair market value. No notional land rental has been applied.

The difference between the fair value of Forest Assets held at the reporting date and the fair value at the previous reporting date is recognised in the Statement of Comprehensive Income as the net change in the value of Forest Assets. All forest expenditure is recognised as an expense in the year it is incurred. The change in value is also disclosed in note 5.5.

The net change in the value of Forest Assets is accounted for in the Forest Assets reserve which is used to store the change in the value of the forest asset.

**Sensitivity analysis for forest assets**

The effects of modifying a range of input variables is demonstrated in this sensitivity analysis:

**Land**

An independent valuation of land owned by ForestrySA was performed by a Certified Practising Valuer from the State Valuation Office, as at 30 June 2023.

Fair value of land has been determined using the market approach. Relevant general and economic factors were considered in arriving at a value opinion, including investigation of recent sales of comparable properties. Discounts by region were applied to reflect restrictions on potential highest and best use imposed by legislation on land operated by ForestrySA. The discount rates used this year are Mount Lofty Ranges 60% (2022: 60%), Green Triangle 45% (2022: 45%) and Mid North 55% (2022: 55%).

**Buildings and structures**

At least every five years, an independent valuation appraisal of ForestrySA's buildings and structures will be performed. However, if at any time management considers that the carrying amount of an asset class materially differs from its fair value, then the asset class will be revalued regardless of when the last valuation took place. ForestrySA undertook an independent valuation appraisal of its buildings and structures in June 2019. A valuation process will be performed in the 2023-24 financial year in line with this policy.

**Plant and equipment**

All items of plant and equipment owned by ForestrySA had a fair value at the time of acquisition less than \$1.5 million or had an estimated useful life less than three years. Plant and equipment has not been revalued in accordance with APS 116.D. The carrying value of the remaining items of plant and equipment are deemed to approximate fair value.

**10.3 Financial instruments**

**Financial risk management**

Risk management is managed by ForestrySA's corporate services section. ForestrySA's risk management policies are in accordance with the SA Government Risk Management Guide and the principles established in the Australian Standard Risk Management Principles and Guidelines.

Forestry SA's exposure to financial risk (liquidity risk, credit risk, and market risk) is low due to the nature of the financial instruments held.

**Liquidity risk**

ForestrySA maintains a strong working capital position so current liquidity risk is low.

**Credit risk**

ForestrySA has policies and procedures in place to ensure that transactions occur with customers with appropriate credit history.

Bank guarantees or cash deposits are obtained for specific customers.

**Impairment of financial assets**

Loss allowances for receivables are measured at an amount equal to lifetime expected credit loss (ECL) using the simplified approach in AASB 9. ForestrySA uses an allowance matrix to measure the expected credit loss of receivables from non-government debtors which comprise a small number of large balances and a few small balances.

To measure the expected credit losses, receivables are grouped based on shared risk characteristics and the days past due. When estimating expected credit loss, ForestrySA considers reasonable and supportable information that is relevant and available without undue cost of effort. This includes both quantitative and qualitative information and analysis, based on ForestrySA's historical experience and informed credit assessment, including forward-looking information.

The maximum period considered when estimating expected credit losses is the maximum contractual period over which ForestrySA is exposed to credit risk.

The expected credit loss of government debtors is nil based on the external credit ratings and nature of the counterparties.

Loss rates are calculated based on the probability of a receivable progressing through stages to write off based on the common risk characteristics of the transaction and debtor.

The following table provides information about the exposure to credit risk and ECL for non-government debtors.

**Notes to the Financial Statements**  
**For the year ended 30 June 2023**

	Debtor unsecured carrying amount \$'000	Loss %	Lifetime expected losses \$'000
Current (non past due)	1706	0.00%	-
1-30 days past due	290	6.80%	19
31-60 days past due	0	100.00%	0
61-90 days past due	0	100.00%	0
90+ days past due	11	100.00%	11

Impairment losses are presented as net impairment losses within net result; subsequent recoveries of amounts previously written off are credited against the same line item.

Receivables are written off when there is no reasonable expectation of recovery.

ForestrySA considers that its cash and cash equivalents have low credit risk due to financial security held for customers with material contracts.

The allowance is recognised when there is objective evidence that a receivable is impaired. The allowance for impairment is recognised in other expenses for specific debtors and debtors assessed on a collective basis for which such evidence existed.

**Market risk**

ForestrySA does not trade in foreign currency, nor enter transactions for speculative purposes, nor for hedging. ForestrySA does not undertake any hedging in relation to interest or foreign currency risk.

Exposure to interest rate risk related to interest bearing liabilities or borrowings is minimal and only related to right-of-use vehicle assets managed through the South Australian Government Financing Authority (SAFA).

Some forest product sales are made to customers with exposure to international market risks including foreign currencies, hence ForestrySA maintains a level of market risk related to its core business of forest product sales.

There have been no changes in risk exposure since the last reporting period.

**Categorisation of financial instruments**

Details of the significant accounting policies and methods adopted including the criteria for recognition, the basis of measurement, and the basis on which income and expenses are recognised with respect to each class of financial asset, financial liability and equity instrument are disclosed in the respective financial asset note and financial liability note per below.

\*Maturities analysis is presented using the undiscounted cash flows and therefore may not total to equal the carrying amount/fair value of the financial instrument.

\*\* Total amounts disclosed here exclude statutory amounts. Receivables do not include prepayments as these are not financial instruments. Prepayments are presented in note 6.2.

**Statutory receivables and payables**

The receivable and payable amounts disclosed here exclude amounts relating to statutory receivables and payables. This includes Commonwealth, State and Local Government taxes and equivalents, fees and charges; Auditor-General's Department audit fees. This is in addition to employee related payables, such as payroll tax, Fringe Benefits Tax, Pay As You Go Withholding and ReturnToWorkSA levies. In government, certain rights to receive or pay cash may not be contractual but have their source in legislation and therefore, in these situations, the disclosure requirements of AASB 7 will not apply. The standard defines contract as enforceable by law. All amounts recorded are carried at cost.
